

BUILT-IN-OPTIONS

OP 002

Individual Zone Alarm Output – Provides eight optional control signal relays corresponding to alarm conditions in each zone. Can be used to inform bms of specific zone in alarm, or control low voltage alarms for local notification of alarms in separate areas monitored by one monitor. The corresponding alarm level is selectable for LOW, MAIN or HIGH alarm levels.

Availability:

Available on IR-SNIF-MCD4, MCD8, MCD16 and SSG-MCD4, MCD8, MCD16.
Can be retrofit on IR-SNIF-1A, 4A and 8A (*Each relay is energized by MAIN alarm only*)
